**Re: Revised Submittal Schedule for FS Report  
Lenz Oil Service Site**

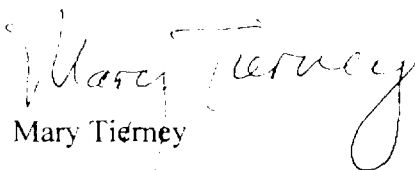

Dear Mr. Bielawski:

Per our conversation on February 3, 1997, the submittal date for the revised feasibility study report for the Lenz Oil site is February 21, 1997.

After speaking with Stuart Hersh regarding comment #16 in the Agency review letter dated January 17, 1997 and subsequently talking with you, the consensus is to replace the last sentence on page 1-20 of the FS report with the following: "In addition, compounds which are in certain RCRA-listed waste were detected in the LNAPL at the site. Because records indicate these same types of listed wastes were transported to the site after November 18, 1980, the LNAPL will be treated as a RCRA-listed waste in this feasibility study and will be handled in compliance with substantive RCRA hazardous waste requirements during site remediation and O&M activities."

Please call if you have any questions.

Sincerely,

  
Mary Tierney
